

Re: References for Atkinson & Partners s.r.o.

We have been cooperating with Atkinson & Partners s.r.o. for many years now. Our mutual cooperation has been extensive, from selling the apartments of the development projects that our company undertakes (e.g. the project Flats Stromovka with a total of 236 apartments) to cooperating in the search for suitable land for future construction. These activities require professional knowledge of real estate planning, the ability to negotiate with the relevant authorities and to evaluate the feasibility of a given project. The absolute reliability and professionalism of our business partners are key qualities for us since they can significantly contribute to the successful realization of our projects. We can recommend Atkinson & Partners as a long-term partner who has in-depth knowledge of the real estate and financial markets. It is a company which can always be relied upon to find the best solutions for their clients.
